Kingland Artificial Breeders Pty Ltd is a company with the goal of developing an export focussed business within the stud sheep and goat genetics,such as embryos, semen and live animals. The directors are Chinese Australians with agricultural business interests in both countries. They have many years importing and exporting experience with animal genetics in both countries.

There is a large opportunity to expand the Chinese livestock industry with improved genetics. Part of the Kingland project is to establish a state of the art breeding and embryo transfer business to both supply local farmers and for export to China. This business is already well established with sheep and goats over last 20 years.

- **Sheep and dairy goats embryos and semen sale, and live animal for domestic and export.**

  绵羊、山羊（奶山羊）种畜胚胎、精液，以及活畜本地销售和国际出口。

- **Sheep and goats breeding technique, such as embryo transfer, artificial insemination services.**

  绵羊、山羊育种繁殖，胚胎移植、人工授精等技术服务，

- **Research and Development of new breeds and new technologies for domestic animals.**

  家畜新品种、新技术的研发。

The Kingland stud sheep and goats farm located at Learmonth near Ballarat Victoria, Australia. A modern Embryo Breeding Centre is established at the site. Ultimately this new agricultural enterprise has the potential to bring large scale development to the Ballarat region and an interchange of learning with local educational establishments as Kingland will develop training programs for both Australian and Chinese farmers who are using the Kingland superior animal genetics to modernise the livestock herds.
